US totals are calculated uniquely for each data element based on only those states who reported numerator (clients served) data.

State Notes:

1. Unduplicated counts are derived through Probabilistic Population Estimation (PPE) on a client file that includes all clients on the CMHC and state hospital caseload for FY2003.
2. Living situation reporting is required at intake, at annual update and at discharge. Figures are based on the latest "living situation" reported. Vermont MH Authority is not responsible for children's RTCs. Crisis Beds are temporary and not recorded as a "living situation."
